Markie CLI Demo - All Features Showcase

Welcome to Markie! This document demonstrates all the features available in the Markie CLI markdown renderer.

1. Basic Markdown

Headers

H1 Header

H2 Header

H3 Header

H4 Header

Text Formatting

This is **bold text**, *italic text*, and ***bold italic***.

Inline `code` and ~~strikethrough~~ text.

> Blockquote with **bold** and *italic*

Lists

Unordered list:

- Item one
- Item two
  - Nested item
- Item three

Ordered list:

1. First item
2. Second item
3. Third item

2. GFM (GitHub Flavored Markdown) Features

Task Lists

- [x] Completed task
- [x] Another done task
- [ ] Pending task
- [ ] Another pending task

Autolinks

Visit https://example.com for more info.

Go to http://test.org today.

Footnotes

Here is a footnote reference[1].

[1] This is the footnote definition. It can contain multiple lines and **formatting**.

Definition Lists

Apple
: A fruit that is red or green

Banana
: A long yellow fruit

Cherry
: A small red fruit

Tables

Left Align	Center Align	Right Align
Cell A1	Cell B1	Cell C1
Cell A2	Cell B2	Cell C2

3. Code Blocks

Rust Code

```rust
fn main() {
    let message = "Hello, World!";
    println!("{}", message);

    let numbers = vec![1, 2, 3, 4, 5];
    for n in numbers.iter() {
        println!("Number: {}", n);
    }
}
```

Python Code

```python
def greet(name: str) -> str:
    """Return a greeting message."""
    return f"Hello, {name}!"

if __name__ == "__main__":
    print(greet("World"))
```

JSON

```json
{
  "name": "Markie",
  "version": "0.4.0",
  "features": ["markdown", "mermaid", "math"]
}
```

4. Math Rendering

Inline Math

Inline equation: $E = mc^2$

Inline binomial: $\binom{n}{k}$

Inline square root: $\sqrt{x^2 + y^2}$

Display Matrix:

$$\begin{matrix} a & b & c \\ d & e & f \\ g & h & i \end{matrix}$$

Aligned equations:

$$\begin{aligned} ax + by &= c \\ dx + ey &= f \end{aligned}$$

Cases (simplified):

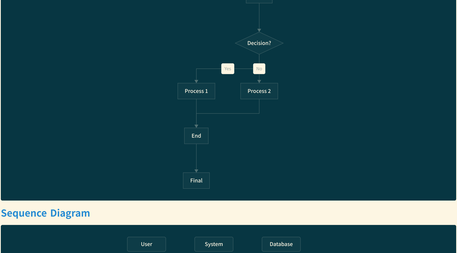
$$f(x) = \begin{cases} x+1 & x > 0 \\ x-1 & x \leq 0 \end{cases}$$

Complex expression:

$$\int \frac{\sqrt{a^2 + b^2}}{c^2} + \sum_{i=1}^{n} i^2$$

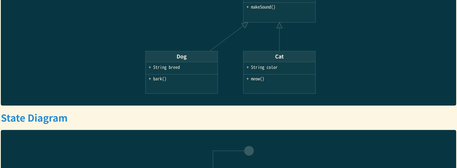
5. Mermaid Diagrams

Flowchart

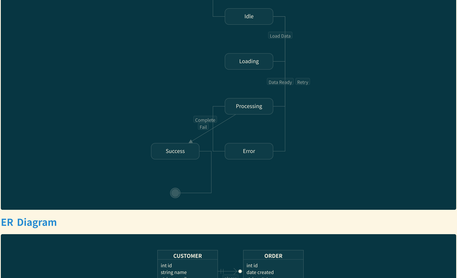


Sequence Diagram

Class Diagram



State Diagram



ER Diagram

6. Combined Example

Project Checklist

- [x] Set up project structure
- [x] Implement markdown parsing
- [x] Add Mermaid diagram support
- [x] Add math rendering
- [ ] Write comprehensive tests
- [ ] Deploy to production

Summary

This document demonstrates that Markie can render:

1. **Markdown** - Headers, lists, text formatting, code blocks
2. **GFM Features** - Task lists, autolinks, footnotes, definition lists, tables
3. **Math** - Inline and display math with matrices, equations, and more
4. **Mermaid** - Flowcharts, sequence diagrams, class diagrams, state diagrams, ER diagrams
